*NFL Alumni* is published semi-annually and distributed at no charge to registered alumni members.

The opinions expressed by the contributors and alumni featured are not necessarily the opinions of the National Forensic League, its officers, or its members.

As we begin our 86th year of service, the NFL is proud to debut a number of new resources and materials for our coaches and students. Many of these changes

are described in this issue of *NFL Alumni*, including a new fundraising portal for our schools, [GiveYouthAVoice.org](http://GiveYouthAVoice.org), and a pilot program which will allow members to determine each month's Public Forum resolution by popular vote. Each of these additions is part of our 2010-11 Membership Services Initiative, which we like to call, "The Year of the Member."

In addition to this year's newest offerings, we are building on the previous successes of some of our most popular programs. [NFLtv.org](http://NFLtv.org) is the Internet's largest video portal for speech and debate resources, providing our members with access to archived final rounds, instructional videos, topic analyses, and more. We are also continuing our District Impact Grants, which provide resources directly to our local leaders for grassroots growth initiatives. As these efforts suggest, we remain committed to ensuring that our members have every available opportunity to succeed.

None of these projects would be possible without the support of our friends and alumni—people like you. On behalf of everyone in the National Forensic League, I thank you for your continued support of our league. Your commitment to forensic education ensures that students will continue to receive the life-changing benefits of speech and debate activities. Together, we can give youth a voice.

Sincerely,

A handwritten signature in black ink that reads "William W. Tate, Jr." The signature is written in a cursive, slightly slanted style.

William Woods Tate, Jr.  
President, NFL Board of Directors

## President Obama Receives NFL Policy Debate Champions

Photo: www.urbandebate.org

On Thursday, July 22, President Obama welcomed to the Oval Office Misael Gonzalez and Kevin Hirn from Whitney Young High School in Chicago, Shagun Kukreja from University High School in New Jersey, and Michael Barlow from Grady High School in Atlanta. Misael and Kevin are the 2010 NFL National Champions in Policy Debate and the 2010 Urban Debate National Champions. Kevin, Shagun, and Michael were the top three individual speakers at the Chase Urban Debate National Championship in April. Misael, Kevin, and Michael all hold a degree of outstanding distinction in the National Forensic League.

In addition to meeting President Obama, the students toured the nation's capital and met with lawmakers including Secretary of Education Arne Duncan, National Economic Council Director Larry Summers, and over 10 Senators and Representatives.

## NJFL Moves to High School Nationals

The 2011 IDEA/NJFL National Middle School Tournament will be in Dallas, Texas, June 16-18, in conjunction with the 2011 LFG/NFL National Speech and Debate Tournament. Middle level coaches and competitors will have the opportunity to interact with their high school counterparts and watch high school speakers perform before taking the stage in their own, highly-anticipated competition. As always, both events are free and open to the public. For more information, visit [www.NFLnationals.org](http://www.NFLnationals.org).

## NFL Establishes New Online Fundraising Portal

The NFL's new Web site, *GiveYouthAVoice.org*, allows NFL schools to raise funds through an easy and secure online interface, similar to sites that allow donors to give directly to individual causes. Funds raised go directly to schools to offset the expenses they choose. *GiveYouthAVoice.org* debuted last spring to help address national tournament expenses, and has expanded this fall to include a number of successful campaigns. So far, schools across the country have raised tens of thousands of dollars for their teams.

## Alum Earns First Emmy Nomination

Photo: Matthias Clamer/FOX

The Academy of Television Arts and Sciences recognized NFL's own Chris Colfer this fall with a nomination for Supporting Actor in a Comedy Series. Colfer plays Kurt Hummel in the Fox hit *Glee*. Colfer was a standout speech team member at Clovis East High School (CA), where he earned three consecutive Valley Championships, bringing home titles in HI, DI, and OPP. In an interview with NFL in April's *Rostrum* magazine, Colfer said, "Forensics was my glee club," noting that many of the skills honed in forensics gave him an edge over other actors.

## Crabtree Achieves Two Unprecedented Milestones

Park Hill (MO) educator Don Crabtree earned his 12th Distinguished Service Award during the 2009-10 season, becoming the first coach in NFL history to achieve such a distinction. The award honors Crabtree's more than 600 citations for outstanding contributions to forensics education. In June 2010, Crabtree reached a second outstanding milestone by co-hosting a record third national tournament (1983, 1994, and 2010). The "Jazzin it up in KC" National Tournament attracted more than 5,000 students, coaches, and spectators from across the nation and as far away as China. Mr. Crabtree, a seven-diamond coach and NFL Hall of Fame member, currently serves as Vice President of the NFL Board of Directors.

## Five Coaches Inducted into NFL Hall of Fame

The National Forensic League inducted five distinguished educators into its Hall of Fame at the 2010 LFG/NFL National Tournament in Kansas City, Missouri. The honorees were elected by their peers in recognition of decades of superior service, dedication, and excellence. The 2010 Hall of Fame honorees include (*from left*): Pauline Carochi (CO); Dale DeLetis (MA); Rosella Blunk (SD); Cathy Wood (KS); and Cat Horner-Bennett (NM).

## NFL Student Receives Key to His Hometown

2010 NFL Student of the Year Cory Williams, a graduate of Hattiesburg High School (MS), received the key to Hattiesburg on October 15 from Mayor Johnny L. DuPree. Williams was recognized for outstanding achievement as a member of the HHS Tiger Forensic Team. In addition to being named the NFL National Student of the Year, Williams was the Mississippi Student of the Year and a finalist in Dramatic Interpretation at this year's national tournament in Kansas City. Williams, now a Chemistry major at Vanderbilt University, is the youngest person ever to receive the key to Hattiesburg.

## NFL to Present at National Conferences

The NFL will engage educators across the country during 2010-11 as it exhibits at a number of prestigious national conferences. Scheduled appearances include the National Council of Teachers of English (NCTE) annual convention; the National Communication Association (NCA) national convention; the National Association of Secondary School Principals (NASPP) convention; the National Federation of State High School Associations (NFHS) Speech/Debate/Theatre directors' meeting; and the National School Boards Association (NSBA) annual conference. ■

*Before she was the CEO of a 1.5 billion dollar company, Jean Taylor was a debater and orator at Minnesota's Mankato East High School. Here, she talks to NFL Alumni about the power of a good coach, the importance of connecting with people, and the unshakable confidence that comes from finding your voice in forensics.*

## **Taylor Made in the NFL**

*by Jean Taylor*

*as told to Jenny Billman*

### **I** grew up in a midsize town

in southern Minnesota called Mankato. From kindergarten through eighth grade I attended a lab school, Wilson Campus School. It was a different kind of setting than your typical public school: You signed up for the classes you wanted to take and built your own schedule. There were no grades *per se*, and you would set your own goals with the teacher and try to achieve them. It was a really good environment for me, because I could set my own goals and work toward them at my own pace.

Because of funding, the school closed after my eighth grade year. I started public high school in ninth grade at Mankato East High School. I'd never been to a public school, and it was a nervous thing for me. One of my classes, American Studies, was taught by Marlin Spangrud, who was also the speech and debate coach. He approached me after class one day and invited me to be part of the team. I was totally new, and this was a chance to get involved and to meet people. So I spent four years of high school doing

speech and debate. Some of my best friends were the folks in forensics. I did decently in debate, really well in speech. I was a state champion in Minnesota and a national qualifier in CX. My primary speech event was Original Oratory. My secondary event was HI (I loved doing Dr. Seuss).

In high school, besides being on the speech and debate team, I was the president of the Student Council. One of my jobs in that position was to lead pep fests—basically, to serve as the emcee at 30 to 40 minute events where I would talk about the school, introduce folks, that sort of thing. Speech and debate was a big confidence booster in terms of my ability to speak in front of people at these events. There is no way I could have addressed 900 to 1,000 students without the skills and confidence I built in speech and debate.

Interestingly, [Board member] Pam Cady Wycoff was a student teacher at Mankato East when I was on the team there. My coach, Mr. Spangrud, taught Oral Communication, and that was one of the classes she student taught. I had her that semester, and she was often a judge in my rounds after that.

She had a natural ability to teach and still be a judge and an opposing coach. She was very thorough, very direct.

Another coach, John Dorn, helped me tremendously with content and writing. He was one of those teachers who had higher expectations of me than I had of myself. It made me think, “Maybe I can do that, because Mr. Dorn thinks that I can.” The encouraging, the pushing, the challenging was never direct. Maybe his approach was special for me because I come from a family with high expectations. Mr. Dorn got me there without saying “You can do better than that.” One Mr. Dorn-ism that stayed with me is that “things work well in triplets.” I still use that.

Of all my coaches, Mr. Spangrud was the biggest influence in my life. He saw something in me, and really nurtured it. He was very much about teaching: There was always a lesson in whatever we did. My most vivid memory of high school speech is Mr. Spangrud helping me be more conversational in my style. One period of the day he had to monitor the school commons for a study hall, and I had that period free, too. I remember that he asked me to sit with him and give my Oratory, just like we were having a conversation. It was weird and uncomfortable—but it became very apparent what he was talking about. And it influenced my style, not only in Oratory, but also in debate. I still think of that often. You need to connect with people, have a conversation, rather than just talk at them or recite.

When I graduated, I attended Augsburg College. They didn’t have a competitive forensic team, so my competitive career stopped there, but I continued to use the skills I’d

learned. After graduation, I worked 10 years in the reinsurance industry with E.W. Blanch. In reinsurance, our customers were basically large insurance companies like State Farm or All State. I was in the actuarial department, and there I helped develop a new model for earthquakes, hurricanes, and tornadoes. I was only 23 years old when we put this together. And I was asked to go out and explain what the model was, and how it worked, because it was so new. I’d visit large insurance companies and I’d be in there with much more seasoned executives, explaining this new model. Fortunately, forensics gave me a level of confidence in those situations. If you feel different or uncomfortable, one of two extremes can happen. Either you shut up or get assertive. My experience, particularly in debate, helped me listen to everyone, really see what they were saying, and made me more effective.

I left my job with E.W. Blanch after 10 years and joined my family company, Taylor Corporation. We were in the print, marketing, and technology industries. I was there for 16 years. I became president of the company in 2001, and later the CEO in 2007. For 3½ years I ran the company. We did about 1.5 billion dollars in sales, and had about 9,500 employees. To think how much forensics helped me in that capacity—pew, it’s a lot! Part of the advantage of a forensic background is the ability to connect with that many employees. We had 15,000 employees when I first began. Over time, as technology improved, we reduced the number of people but grew in size. As the company changed, it became important to find a way to connect with people when you couldn’t have a

personal relationship, when you had to find some other way to relate to them. Again, the skills I learned in forensics helped me think about how to connect with them. Understanding people and establishing common ground with them helped, too.

A lot of what I did in my family company involved transformation. It was taking a printing company and moving it to a technology company. Knowing this, I see that the ability to communicate is so important, and will become more and more important. It was significant when I left high school, but as I look at business, government, health care, and education today—it’s critical. The experiences we have as NFL alumni are really valuable, no matter what we do. It could be any number of fields, or even with your family and community, and it’s still so, so critical.

Since leaving Taylor Corporation, I’ve gotten involved in the Minnesota governor’s race, and it’s reminded me that things can get so polarized. Sometimes we get a little quick to grab onto opinions. But in speech, people develop solutions that are backed up with evidence. Of course, being persuasive is important. But you have to have evidence to back it up. If it isn’t good, people challenge it. We need to take a step back and consider the facts and work toward solutions. And debate is a fabulous place to start.

As I look to what I’ll do next in my career (and it’s pretty open now, it’s a wonderful time!), the things to which I have been exposed—how to communicate, how to collaborate—those things are huge. I can guarantee that I will continue to use the skills I learned in speech and debate, even beyond the level to which I’ve used them so far. ■

## **A Star is Born: An Interview with Tyler Langdon**

### **T** Tyler Langdon's star is on the rise.

The newly-minted winner of the prestigious Hollywood Discovery Award, Langdon is one of the most sought-after young actors in Hollywood. He was nominated for the award after being hand-selected from a nationwide pool of 18-25 year old actors by a blue-ribbon panel of casting directors. The nomination itself was huge—recognition in this category generates intense publicity, and easily translates into a top agent, a top manager, or coveted auditions for television and movies. When Langdon was crowned the winner after a nationwide vote, it marked a watershed moment in his career.

Of course, Tyler Langdon certainly knows a thing or two about winning. Before he arrived in Hollywood, he was the 2004 National Champion in Duo Interpretation and the 2003 NCFL National Champion in Duo. Hailing from Plymouth High School in Indiana, he holds a degree of Premier Distinction in the National Forensic League. A conscientious student, he was also the valedictorian of his high school class.

Still, Langdon didn't always intend to become an actor. In fact, he initially planned to become a weatherman. In college at Notre Dame, he changed

career paths again, majoring in business and spending the next four years focusing on school. "I never had a chance to do college theatre or broadcasting, and I really did feel a void in my life without it," he recalls. After graduation, he was recruited to manage an upscale restaurant in Los Angeles. "I planned to manage restaurants for the rest of my life," he explains. "But it ended up being awful." Worse still, Langdon's restaurant was almost entirely staffed by aspiring actors. "They talked about how much fun they were having, what they were doing. I was pretty jealous, because that's what I wanted to do."

"Eventually, I realized that you had to pick one or the other [acting or management]. The acting bug was too strong, and it powered over everything else." After two months in the restaurant, Langdon resigned his position and plunged into performance. "I quit before I had side work lined up," he admits, seeming to marvel in hindsight at his own reckless determination. "At one point, I had five dollars left. It was hard to go from making good money in the restaurant to making nothing for a few months. Thank God I finally booked a job!"

Since then, the jobs have continued steadily for Langdon. Langdon recently booked the lead

**“I’m happiest  
when I’m  
performing,  
when I’m  
affecting people  
in some way.”**

in his first full length film, *Nerve*, and signed on for a commercial for “Wicked Attraction” on Investigative Discovery. Each new job has positioned him to meet a lot of people in the industry, many of whom he grew up admiring. Each job also gets him closer to his long-term goals: first, a sitcom; then, film.

His success at finding work stems in part from a unique knack for auditions—not surprising, since he says that the process is reminiscent of forensics. “A lot of times, I feel like I’m back in speech and debate again because it’s just like going into prelim rounds. You move from first round auditions to second round auditions to final round auditions.” Having endured hundreds of rounds before, Langdon draws a tremendous advantage from his speech and debate background. “It gives you the confidence to walk in to the room and know that you have more performance background than more people, that you’ve done it before, that you’ve gone against people and won rounds, that other people have found you funny or moving.”

“Four years of high school speech and debate is like acting training, especially when you have perfect coaches like I did,” he continues. “It really does get rid of a lot of the nerves you might have. It also trains you to know how to prepare for auditions—to prepare a character, rather than walking in cold the way that most people do. It teaches you to be prepared before you show your work to other people.”

Still, for even the most talented, the transition to acting is a bumpy one. “The thing everyone talks about

is how long it takes to break into the industry. Anybody you see on TV has been at it for seven or eight years, so it’s a long upward climb,” Langdon reports. “Don’t expect to be an overnight success. Expect to be a seven-year overnight success.” Even so, he encourages would-be actors to go for it. “I apologize to all of their parents,” he laughs, “but honestly, if it’s what makes you happy, you should 100% pursue it. I tried to push it under the rug for a while, and it didn’t make me happy. Looking back in 20-30 years, anyone who has the passion and doesn’t try will regret it.”

Having taken the plunge himself, Langdon can say goodbye to the regrets he once felt as a restaurant manager. Better still, the journey from Duo champion to award-winning actor has taught Langdon a thing or two about himself. “I’ve learned that I’m definitely where I’m supposed to be. I’m happiest when I’m performing, when I’m affecting people in some way. I’ve also learned that I’m very much a people person—I enjoy talking to people and getting to know people and giving people an opportunity to see what I have to offer.”

For Hollywood’s newest discovery, the future looks bright. But Langdon explains that it’s more than just roles or recognition. “I want people to remember me as a great friend, as someone who could make them laugh... someone who could make them happy when they are down, someone who was never afraid to pursue his dreams, someone who worked harder than everyone else they knew... and hopefully someone who achieved a great level of success.” ■

SOME THINGS ARE STILL THE SAME.**

*Giving Youth a Voice Since 1925*

# Service in the City

## NFL Hosts First National Service Project at Kansas City Nationals

### **I**n just twelve short hours,

students, coaches, and friends at the 2010 NFL national tournament in Kansas City, Missouri, made history by participating in the NFL's first-ever national service project. Partnering with Numana, Inc., a nonprofit hunger relief organization, the NFL enlisted its national tournament qualifiers, coaches, and supporters to prepare food to send to the earthquake-ravaged island nation of Haiti. Not only did the project produce 525,960 life-sustaining meal kits, it also put a real world face on students' research, writing, and speaking throughout the year.

The search for an appropriate project with scope, relevance, and feasibility began long before the first bags of rice were opened. Multiple target areas were considered, but world hunger quickly emerged as a paramount social concern. As speech and debate students know, food insecurity lays the bedrock for civil and political unrest and devastates populations. The numbers are striking: More than 25,000 people die each day of hunger around the world. One in

six members of the global community lacks access to proper food. One child dies every six seconds, six hundred each hour, or nearly six million per year. The situation is particularly dire in Haiti, a nation devastated by natural disaster, low literacy rates, and high unemployment—where starvation is the single most preventable cause of death.

Numana's mobile meal packaging infrastructure provided an ideal way to respond to the humanitarian crisis in Haiti. A single Numana package takes seconds to create, but feeds six people a healthy and nutritious meal. Volunteers work in teams to combine rice, freeze-dried nuts, and vitamins into a single, durable pouch. Each member of the team is entrusted with a different job: Some workers measure and pour raw ingredients, others weigh each bag. Still others seal the bags or box the completed packages. In doing so, volunteers from across the nation—many of whom would become rivals in the days of competition ahead—could work together to help save lives in Haiti.

Resolved to make a difference, and bolstered by Numana volunteers, the NFL opened its doors at 6:30 a.m. on

# SERVICE

June 13 for the first service project participants. National qualifiers and coaches from Canton McKinley High School in Ohio were the first to arrive, including Coach Manuel Halkias, assistant Nicole Shaydle, sophomore Constance Savo, and senior Kayley Miller (*pictured below*). As the Canton McKinley contingent donned their hairnets and aprons, the team explained why they were so eager to serve. “It’s important to give back,” coach Halkias explained, his team nodding in agreement. Savo continued, “Speech is always about helping people, whether it’s coaches helping us or us helping others. You’re always helping someone.”

Because the service project was scheduled the same day as national tournament registration, all national tournament qualifiers, coaches, and chaperones had the opportunity to participate. Nearly 100% of our potential volunteers took advantage

of the opportunity, with some teams serving for three hours or more. At times, more than 600 volunteers worked in tandem to package meals for distribution in Haiti. As they worked, volunteers discussed the project and the significance of service. One student noted, “We talk about service all year, and this is a great opportunity to take all of the people in one place and do something really big.”

Periodically, a gong would sound to acknowledge 10,000 meals bagged. By the end of the day, the gong had sounded more than 52 times. As the last volunteers sealed their bags around 7 p.m., more than 525,960 meals were counted—enough to feed more than two and a half million people. Within the next two days, the 82nd Airborne Division of the US Army transported the packaged meals to Haiti.

Although the project was designed to serve the people of Haiti, NFL’s own members were equally affected. “It was thrilling to work side by side with, and to get to know, people from all across our nation all with one common goal: to save the starving,” said Nicholas Adams, Pennsylvania District Student of the Year. “The

hundreds of student volunteers embodied the true mission of the NFL, to unite in building a stronger tomorrow together.”

The service project also had the unique result of demonstrating the relationship between the topics used in speech/debate and real world needs. Many NFL students specifically discussed poverty and recovery in Haiti during the 2009-10 year. The meal packaging event provided them with an opportunity to develop a sense of connection and responsibility to the nation they studied, where food supplies are insecure.

At its conclusion, the national service project engaged NFL members and represented one of the most successful single-day events in Numana’s history. It created solidarity among would-be rivals and excitement to serve among all who participated. Plans to hold a second National Day of Service at the Dallas 2011 Nationals are already in the works. Educated and inspired by our first service project, the NFL community is poised to make an even bigger impact this time around. ■

*Chris Cugini ('09)  
talks about life  
after forensics and  
joining his local  
school board.*

# Q&A with Chris Cugini

● **How did you get started with forensics?** I have always been told that I speak well and am passionate when trying to stress a point. In my freshmen year my teachers told me to join the speech and debate team, so I did. I was in Policy Debate with my best friend, but it just was not for me. After quitting the team I thought my speaking skills would suffer, and they did for some time. So in my senior year I was asked to rejoin to compete in Congress, which had recently been made an event. I competed and placed 1st at three tournaments, 2nd and 3rd at several tournaments, was a State Qualifier and placed 7th at districts. Congress is truly the event which allowed me to sharpen my speaking skills, critical thinking, and organization.

● **Describe your coaches, and how they had an impact on your success.** I had two of the greatest coaches that a speechie or debater could ask for. Tom Mossberger and Nick Bollas are two men who truly have a love for speech and debate. They spread their love to every member of the GlenOak High School team and help them with their events. I knew they believed in me as well as my speaking abilities, and that gave me the fuel to win. I truly attribute

all of my successes in Congress to these two men.

● **What specifically did you learn in forensics that prepared you to serve in public office?**

It taught me how to research useful information, prepare it, and then be able to organize it. I use this process daily when trying to put together my thoughts on issues. The organization leads to speaking and leaving a lasting impact. I have been able to speak on my feet and have it sound just as professional as a word-for-word written speech.

● **What prompted you to run for school board?** I actually was approached by a teacher in my senior year to think about running for it. I thought if an employee of this district thinks I—the young guy with no experience—could make changes, then it could be true. I truly love the school district, as well, and I wanted a connection to it while going off to college. It had made me into the person I am today. Being involved with politics for some time I sat down with my mentor Janet Creighton who was the former Mayor of Canton, Ohio. When she said she thought it was a good idea, I knew I had to do it.

● **What do you find most challenging—and most rewarding—about serving on the school board?** I find making the various school events a little challenging. I have class or other commitments at night so trying to be at elementary, middle school, or high school functions can be

difficult. The most rewarding thing is giving back to the school district that allowed me to blossom, be involved, compete in speech and debate, meet my mentor, have some of the best friends, and have the pride of being a GlenOak Golden Eagle.

● **What advice would you give to aspiring politicians?** Never think any task is too big or too much to handle. Be involved in any way that you can be. Develop a political identity and be able to stick up for it. Know yourself. Know your constituency. Do your homework. ■

*At the NFL, we're passionate about serving our members and alumni! Just take a look at what's in store this year.*

## **NFL and Pi Kappa Delta Announce Alumni Points**

In conjunction with Pi Kappa Delta (PKD), the college and university-level national honorary society for speech and debate, the NFL is pleased to announce new recognition opportunities for NFL alumni. As members of PKD, NFL alums will soon be able to record points and receive recognition for speaking engagements after high school. Members will also have access to new professional and networking opportunities as part of the enhanced alumni services. To learn more, simply return the enclosed card in the center of this magazine (remember to check the "Learn more about PKD" box!). You may also visit [www.NFLonline.org/Alumni/JoinPKD](http://www.NFLonline.org/Alumni/JoinPKD) for more details.

## **Judge Training and Certification**

The NFL has announced a groundbreaking nationwide initiative to train and certify judges. All trained judges will achieve basic competency in the mechanics and ethics of judging forensic competitions. Judges who successfully complete training exercises and pass testing benchmarks will be certified by the NFL. The NFL is excited to take a lead role in promoting consistent, thoughtful forensics adjudication throughout the United States.

## **Event Exploration Portals**

The NFL is creating new event exploration portals, which will provide comprehensive resources for each main competition event and arm engaged alumni with the necessary resources to recharge their communities. Coaches will be able to access event introductions, textbooks, lesson plans, handouts, sample speeches and videos, commentary, and even event-specific shopping lists—all in a single, user-friendly interface. Completely online, the event exploration portals will extend the forensic community's best resources to previously underserved communities—especially rural and urban schools—to help promote excellence from all members. ■
